### IDANA-NJ Presents

## The Lanap Laser New Restorative Techniques for Composites from 3M

**Date: June 9<sup>th</sup>, 8:30am - 12:30pm**

**Healthy Breakfast: 8:30am**

#### **Presenters:**

**9:30am - 10:30am**

#### **Michelle Rodriguez**

PerioLase Periodontal Consultant

She is going to introduce the latest designed lase and technology behind it. The PerioLase® MVP-7™ is the only laser designed especially for the LANAP™ protocol

**10:30am – 12:30pm**

#### **Shelley McMahon:**

She is a local dental practice consultant here to introduce 3M and Bioclear partnership. She will discuss nano technology with 3M restoratives and answer any questions in regards to direct and indirect materials.

#### **Zubair Ravat:**

She is here to discuss the techniques and products related to the Bioclear Method. This includes modern cavity preparations and injection molding using heated composite. The method is designed to give stronger, longer lasting composite restoration all the while conserving as much tooth structure as possible to provide a patient centered outcome. For those of you who have not used heated composite we are happy to say a hands on element will be included.
